SQS fair queues is now available for standard queues.
Automatically manage noisy neighbors in your queues with fair queues, a new feature that limits noisy neighbor impact across all message groups. Add a group identifier to your messages, and SQS re-orders messages to ensure no single tenant impact the time in queue for any other tenants.

Info

Authenticate your non AWS workloads and securely provide access to AWS services.

Access AWS from your non AWS workloads

Operate your non AWS workloads using the same authentication and authorization strategy that you use within AWS.

X.509 Standard

Use your own existing PKI infrastructure or use [AWS Certificate Manager Private Certificate Authority](#) to authenticate identities.

Temporary credentials

Use temporary credentials with ease and benefit from the enhanced security they provide.
